

DMSO MSRR Node

A Brief Overview

Current Status

- Operated by the MSIAC for DMSO
- 700 plus resources
- Contains only joint and DoD enterprise level resources
- Has the ability to:
 - Deliver actual resources, as well as catalog them
 - Protect resources from unauthorized users
 - Can protect resources on other servers

Current Status

(continued)

- Includes a web indexer (Ultraseek)
 - Ultraseek results returned with registry results
- Indexer transitioning from Ultraseek to Microsoft Site Server
 - Expect transition by January 01
- Supports multiple sponsors via resource coordinators
 - A left-over from the period when it was designed to be the single MSRR

Upgrade Plans

- Modifications to support and host the Joint ADS
- API to support auto-registration of CMMS (a.k.a. FDMS) via the CMMS toolset (includes common username, password, and security infrastructure)
- API to support auto-registration of HLA object models via the Object Model Resource Center
- Upgraded keyword capability to support true controlled vocabulary

Interoperability with Other Systems

- Tri-Service
- BMDO
- C4ISR
- ADS
- Others to come on CY-01
(see Upgrade Plans)
